**SARS COV -2 REAL TIME PCR**

SARS-CoV-2 (COVID-19)  
RT-PCR

POSITIVE

Please refer the table below

CT Value: N Gene/ORF1ab(RdRp Gene)

19.65/19.51\*

**Clinical Significance:**

Result	Remarks
Positive	RNA specific to SARS-CoV-2 Detected.
Negative	RNA specific to SARS-CoV-2 NOT detected.
Inconclusive	A repeat testing on fresh sample is recommended.

ICMR Covid - 19 lab Registration number is HIMEPLGH.

Test conducted on Nasal & Throat Swab Samples.

Lower respiratory tract samples like Sputum, BAL, ET aspirate are appropriate samples especially in severe and progressive lung disease.

Kindly consult referring Physician / Authorized hospitals for appropriate follow up.

Covid-19 Test conducted as per kits approved by ICMR/ CE-IVD/ USFDA.

**Limitations:**

- Negative results do not preclude COVID-19 and should not be used as the sole basis for patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.
- Presence of inhibitors, mutations or insufficient RNA Specific to SARS-CoV-2 can influence the test result. Kindly correlate the results with clinical findings.
- Positive results but do not rule out bacterial infection or co-infection with other viruses.
- Optimum specimen types and timing for peak viral levels during infections caused by 2019-nCoV have not been determined. Collection of multiple specimens (types and time points) from the same patient may be necessary to detect the virus.
- If the virus mutates in the rRT-PCR target region, 2019-nCoV may not be detected or may be detected less predictably. Inhibitors or other types of interference may produce a false negative result.
- The performance of this test has not been established for monitoring treatment of 2019-nCoV infection.

Comments: SARS-CoV-2, formerly known as 2019-nCoV, is the causative agent of the coronavirus disease 2019 (COVID-19). Main symptoms of the disease include fever, cough and shortness of breath. The virus is spread via person-to-person contact through respiratory droplets produced when a person coughs or sneezes. The SARS-CoV-2 RNA is generally detectable in nasopharyngeal/oropharyngeal swabs during the acute phase of infection. Positive results are indicative of active infection. Real Time PCR assay targets specific genes and can be used for diagnosis of SARS-CoV-2 virus infection which contributes to severe upper respiratory distress, complications

**CONDITIONS OF LABORATORY TESTING & REPORTING**

1. It is presumed that the test sample belongs to the patient named or identified in the test requisition form.	4. The results of a laboratory test are dependent on the quality of the sample as well as the assay technology.
2. Hindustan Wellness confirms that all tests have been performed or assayed with highest quality standards, clinical safety & technical integrity.	5. Result delays could be because of uncontrolled circumstances. e.g. assay run failure.
3. A requested test might not be performed if:	6. Laboratory results should be correlated with clinical information to determine Final diagnosis.
a. Specimen received is insufficient or inappropriate specimen quality is unsatisfactory	7. Test results are not valid for Medicolegal purposes.
b. Incorrect specimen type	8. In case of queries or unexpected test results please call at customer care (9810981073/83).
c. Request for testing is withdrawn by the ordering doctor or patient	
d. There is a discrepancy between the label on the specimen container and the name on the e-test requisition form

### 1. HOW DOES HINDUSTAN WELLNESS DELIVER EXCELLENCE IN DIAGNOSTIC SERVICES?

Hindustan Wellness has always been committed to providing Superior Quality diagnostic services. We follow the most stringent and internationally accepted quality assurance systems to provide quality to the doctors and customers. Some of the highlights how we deliver quality are:

1. NABL ACCREDITED Lab covering over 10,000 sq. ft. State of Art Pathology Lab.
2. Bar Coded & Bi Directional Systems.
3. US FDA/CE approved, fully automatic equipments.
4. Highly experienced team of doctors from India's most prestigious medical colleges.
5. Strong medical and technology partnerships with Beckman Coulter- USA, Biorad- USA, Siemens- Germany, BD- USA etc.

### 2. WHY IS HINDUSTAN WELLNESS TRUSTED BY DOCTORS?

In the last 8 years, we have touched over 15 LAKH+ Lives, performed over 3 CRORE+ investigations and are on a mission to make Hindustan Healthier.

Our relentless commitment to quality has helped us garner the trust of doctors. Delivering precision and accuracy in every single test has earned us the reputation. We work together with doctors to be able to provide precise diagnosis to our customers and make a difference to their lives.

Hindustan Wellness is also a trusted Wellness Partner of Fortune 800+ companies.

### 3. HOW IS HINDUSTAN WELLNESS ABLE TO PROVIDE SUCH AFFORDABLE RATES?

Hindustan Wellness is able to provide services at very affordable cost due to our business model. We pass the discount of franchise and middlemen directly to our end customer.

Since all samples are processed in our own lab, where tests are conducted in fully automated environment, hence the both quality and efficiency is much higher. Due to this Hindustan Wellness is also able to pass on this efficiency benefit to our customers.

### 4. HOW DO I CHECK MY REPORTS AND WILL I GET HARDCOPY OF THIS REPORT?

Hindustan Wellness cares deeply about the environment and acts responsibly to avoid any negative environmental impact. Hindustan Wellness has a strict paperless policy. We do not send paper to customers and aim to reduce incoming paper to our offices to as close to zero as possible. We are the first company in healthcare sector to say no to paper.

A customer may instead view their Hindustan Wellness reports on:

1. 'HINDUSTAN WELLNESS' App (Available on Google Playstore & iTunes)
2. Your Registered Email Id
3. On Whatsapp
